TITLE	Summary of the Fifth Annual Desegregation Status Report for Public Postsecondary Education Institutions in the State of Maryland.
INSTITUTION	Maryland State Board for Higher Education, Annapolis.
PUB DATE	Feb 79
NOTE	41p.; Some tables may not reproduce well
AVAILABLE FROM	State Board for Higher Education, 16 Francis Street, Annapolis, MD 21401
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	Associate Degrees; Bachelors Degrees; Black Students; *College Integration; *College Students; *Degrees (Titles); Doctoral Degrees; *Enrollment Trends; Geographic Distribution; *Higher Education; Masters Degrees; Place of Residence; Professional Education; *Racial Composition; Resident Students; State Boards of Education; *State Colleges; State Surveys; State Universities
IDENTIFIERS	In State Students; *Maryland; Public Higher Education

ABSTRACT

This summary of the Fifth Annual Desegregation Status Report for the State of Maryland presents data on residency, enrollment, degrees granted, and boards associated with higher education. The data, except for degrees granted, were collected by the state public postsecondary institutions at the beginning of the fall semester 1978. The data on degrees granted covers July 1, 1977 to June 30, 1978. Each section is preceded by a short description of the tables, which are of a summary type. Tables include the following: residence by county of origin by race for Maryland residents; residence status by race for all students; trends in enrollment by race for undergraduates and graduates/first-professionals; enrollment by program by race for undergraduates, graduates, and first-professionals; trends in the distribution of full-time black undergraduate students among the state public higher education institutions; analysis of the 1977-78 drop in black full-time enrollment; degrees granted by program by race for certificates and associates, bachelors, masters, doctorates, and first-professional; degrees granted to black students by race of institution; trends in degrees granted for 1975-78; racial composition of members of boards associated with higher education; and racial composition of employees of boards. FOREWORD

The State Board for Higher Education has prepared the "Fifth Annual Desegregation Status Report for Public Postsecondary Education Institutions in the State of Maryland." This report was prepared in accordance with the provisoes of the "Maryland Plan for Completing the Desegregation of the Public Postsecondary Education Institutions in the State." The full report is available for public inspection in the State Board's office. This volume summarizes the data of the full report.

Summary

of the

FIFTH ANNUAL DESEGREGATION STATUS REPORT
for Public Postsecondary Education Institutions
in the State of Maryland

February 1979

INTRODUCTION

The data in this summary of the Fifth Annual Desegregation Status Report are presented in four sections: Residency, Enrollment, Degrees Granted, and Boards Associated with Higher Education. The data (with the exception of Degrees Granted) were collected by the State public postsecondary institutions at the beginning of the Fall semester, 1978. The Degrees Granted data covers the time span from July 1, 1977 to June 30, 1978.

Each section is preceded by a short description of the tables which highlights the main points. All tables are of the summary-type. The SBHE believes that these summary tables are an accurate reflection of the status of the desegregation process in the State. However, should the reader be interested in more detailed information, he/she is welcome to contact the State Board for Higher Education office.

SECTION I

Residency

Residency of Students Enrolled, Fall 1978

Table 1a - Summary of Residency by County of Origin for Maryland Residents

Table 2a presents information on the county of origin for Maryland residents enrolled in Fall 1978. The data represent all the State's collegiate institutions and include full and part-time students at the undergraduate, graduate and first-professional levels.

The institutions reported a total of 166,954 students who were State residents. The jurisdictions with the largest shares of students were: Baltimore County (21%), Prince George's and Montgomery Counties (17% each), and Baltimore City (15%). For black students, 30,677 were reported as Maryland residents: 48% from Baltimore City and 24% from Prince George's County.

Table 1b - Summary of Residency Status for all Students

Table 2b presents information on residence status for all students (part and full-time; undergraduate, graduate and first-professional), enrolled in the State's public collegiate institutions in Fall 1978. The institutions reported 186,689 students enrolled: 89% were considered Maryland residents, 7% out-of-state, 2% foreign and 2% of unknown residence.

The percentage of out-of-state black students attending Maryland institutions (10%) was somewhat larger than the percentage of out-of-state white students (7%).

SECTION II

ENROLLMENT

Fall 1978 Enrollment

Tables 2-a to 2-h show the Fall 1978 enrollment data. Included are the nineteen community college campuses, the eight State universities and colleges, and four campuses of the University of Maryland (UMUC has been excluded).

Tables 2-a and 2-b - Trends in Racial Composition of Full-Time Students

Table 2-a shows the racial composition of full-time undergraduate students for years 1970, 1977, and 1978. Also included are the 1980 projected ranges. In the Fall, 1978, the State's public higher education institutions reported 17,645 (21.3%) black students enrolled as full-time undergraduates. This compares favorably with the State's black population (around 21%) and the proportion of May, 1978, high school seniors (21.6%). Thirteen of the 23 predominantly white campuses[1] have already reached their 1980 ranges of black enrollment. The predominantly white community colleges as a group (13.2% vs. 11.9%), and the State as a whole (21.3% vs. 21-23%), have also reached the 1980 objectives.

Table 2-b shows the racial composition of full-time graduate and first-professional students for years 1970, 1977, 1978, and the total 1980 projected ranges. Of the 6,806 students reported, 598 (8.8%) were black.

Table 2-c - Total Enrollment by Race

The total Fall, 1978 enrollment (undergraduate, graduate and first-professional; full and part-time), in the State's public higher education institutions was 186,689 students. Of those, 18.6% were black, .3% Indian American, 1.2% Asian, and .9% Hispanic.

[1]Wor-Wic Tech was not in existence at the time the 1980 projected ranges were established.

Tables 2-d through 2-f - Enrollment by Program

Table 2-d shows the trends (1977-1978) in racial enrollment by program for all undergraduate students. The programs with the highest proportionate black enrollments were Public Affairs and Services (34%), Education (31%), Public Service Related Technology and Mathematics (27%). Those programs attracting the lowest proportionate black enrollment were Agriculture and Natural Resources (2%), Area Studies (3%), Architecture and Environmental Design (4%), Engineering (6%), Foreign Languages (7%), and Computer and Information Sciences (8%).

Table 2-e shows the same type of data, but for graduate students. Programs with large proportions of black students were Architecture and Environmental Design (69%), Public Affairs and Services (20%), Education and Business and Management (17%). Those with low proportions of black students were Engineering and Physical Sciences (1%), Computer and Information Services (2%), Natural Resources and Biological Sciences (3%), and Area Studies (4%).

Table 2-f shows the trends in first-professional degree enrollment by program. Blacks are 7.0% of the Dentistry students, 6.4% of the Medicine students, and 7.2% of the Law students.

Table 2-g - Trends in the Distribution of Full-Time Black Undergraduate Students Among the State's Public Higher Education Institutions, 1974-1978

Table 2-g summarizes the progress the State of Maryland has made in desegregating its postsecondary education institutions since the Maryland Plan[2] was adopted.

[2]Maryland Plan for Completing the Desegregation of The Public Postsecondary Education Institutions in the State, February 1974.

The total black full-time undergraduate enrollment has increased by 29%; the enrollment of blacks in predominantly white schools went up 55% in four years, while the black institutions were also increasing their black enrollment by 13%. This past Fall, 44% of the black undergraduate students enrolled full-time were in predominantly white institutions.

Table 2-h - Analysis of the 1977-1978 Drop in Black Full-Time Enrollment

Table 2-h shows that black full-time enrollment in the State public higher education institutions decreased at a larger rate than the total drop in enrollment. This holds for the undergraduate and graduate as well as the first-professional students.

A detailed analysis of this table reveals that the black full-time undergraduate enrollment drop occurred at the Community College of Baltimore, the three black State colleges and universities (Bowie, Coppin, and Morgan), and the three predominantly white campuses of the University of Maryland (UMAB, UMBC, and UMCP).

*Data for graduate and first professional students by institution are not available for 1970 or 1980 projected ranges; the 1970 and 1980 figures reported here are taken from the "Maryland Plan for Completing the Desegregation of the Public Postsecondary Education Institutions in the State."

**State Colleges and Universities totals exclude the University of Baltimore for 1970, and the University of Baltimore Law School for 1977, 1978 and 1980 projections.

***UMBC and UMCP

****Professional Schools totals include University of Maryland at Baltimore (both graduate and first professional) for 1970; University of Maryland at Baltimore (both graduate and first professional), and University of Baltimore Law School for 1977, 1978 and 1980 projections. University of Baltimore became a public institution in January, 1975.

SECTION III

Degrees Granted

Degrees Awarded from July 1, 1977 to June 30, 1978

Tables 4-A to 4-E show the degrees awarded by program areas. Data are included from all nineteen community college campuses, the eight state universities and colleges, and the five campuses of the University of Maryland.

Table 4-A and 4-B - Undergraduate Degrees

Of the 947 certificates awarded, 75 (7.9%) went to black recipients. The largest number of black students received certificates in Public Services Related Technology. Regarding Associate Degrees, 1,044 (13.4%) of 7,784 went to black students. Interdisciplinary Studies (the program area which includes most of the students who want to transfer to a 4-year institution), had the largest number of blacks; however, the 226 black students who received an Associate Degree in Public Service Related Technology made up 29% of all degree-recipients in that area.

The State public institutions awarded a total of 13,429 bachelor degrees. Of those, 1,639 (12.2%) went to black students. The areas with the largest number of black recipients were: Education, Social Sciences and Business and Management.

Tables 4-C through 4-E - Graduate Degrees

Of the 3,088 master degree recipients, 460 (14.9%) were black students. The areas with the largest number were: Education, Public Affairs and Services, and Business and Management.

The State public higher education institution awarded 350 doctorates (excluding first professional degrees). Fifteen of them went to black students. The area with the largest number of black recipients was Education.

Of the 774 first professional degrees in Dentistry, Medicine and Law awarded by the institutions, 54 (or 7.0%) were awarded to black students. The largest number was in Law.

Tables 4-F and 4-G - Degrees by Race of Institutions and Trends

While in 1975 only 28% of the black baccalaureate degree recipients graduated from predominantly white institutions, by 1978 that proportion had increased to 43%. The proportion of black students receiving a Masters degree from a predominantly white institution also increased from 1975 (25%) to 1978 (35%).

As for actual number of degrees, the number of black degree recipients has increased in the last three years more rapidly than the number of white degree recipients. This holds for all types of degrees except the master.

SECTION IV

BOARDS ASSOCIATED WITH HIGHER EDUCATION

Boards and Agencies Associated With Higher Education
(From October 1, 1977 to October 1, 1978)

Table 8-A - Racial Composition of State Boards Associated With Higher Education

The median black membership in the statewide boards is 23%. For the segmental boards the median becomes 25%. These two figures compare favorably with the number of blacks in the State population - around 21%. The median black membership in the local boards is lower (13%); however, these boards should reflect the local population, not the State's. Hence, the 13% figure can be misleading.

No member of the boards is a non-black minority.

Table 8-B - Racial Composition of Employees of State Agencies and Boards Associated with Higher Education

Table 8-B includes all full-time employees. Out of 28 executives/ administrators on the staff of the State boards and agencies associated with Higher Education 3 (10.7%) are black, and 1 (3.6%) is a non-black minority. Among professionals, 6 (7.4%) are black and 3 (3.7%) are non-black minorities. As for all other personnel, 10 (10.5%) are black.
